Professional Summary:

Results-driven **Software Developer** with **5+ years of experience** in designing, developing, and optimizing scalable applications. Proficient in **Java (8/11)**, **JavaScript**, **Python**, and modern frontend frameworks such as **Vue.js** and **Angular**. Strong background in **backend and full-stack development**, with hands-on expertise in **SQL**, **Git**, **Agile**, and **Scrum methodologies**.

Passionate about learning new technologies and expanding into **Machine Learning and Data Analysis**, with experience in **PyTorch**, **TensorFlow**, **scikit-learn**, and **NumPy**. Thrives in dynamic environments, adapts quickly to new challenges, and enjoys solving complex technical problems.

Looking for an opportunity to apply my **software engineering expertise** while continuously growing in **data-driven development** and modern software architectures.
